^ “This introductory videotape was originally created in 1996 from a lecture-demonstration by Clifford Shulman provided in an appearance on the cable TB program, “Alive & Wellness” on Americas Talking network. In it, Clifford Shulman responds to questions by network TV anchor Carol Martin and demonstrates Trager work on a client and is observed by a live audience. It’s a wonderful, succinct 14 minute broadcast quality tape which is chock full of information about Trager, impressive graphics and makes it easy to introduce the work to people in a short period of time. Some people have given it to potential clients to watch, asked clients to share it with friends, or have used it as part of a lecture-demonstration or an introductory workshop. A useful addition to your video library!”
